The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-17, and 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson. Thompson discloses a door panel (12) comprising a bottom portion(16), a formation (22) extending therefrom, a barrier portion (14) extending therefrom in a spaced apart relationship to the formation (28, 36 as seen in Figure 3), a seal member comprising a head portion (23), a flap portion (49) extending from the head portion and contacting a distal end of the barrier portion (14), the head portion (23) defining a boot-shaped opening having a heel portion (41), a toe portion (51) angularly displaced from the heel portion (41), a curved arch portion tapering from the heel portion (41) to the toe portion (51) (the curved arch portion is element 43 as seen in Figure 3), and the complementary shaped formation (28, 36) mounting the seal member.

Applicant's arguments with respect to claims 1, 3-17, and 21-22 have been considered but are moot in view of the new ground(s) of rejection.
